

Dear Sir / Madam,

To celebrate the 27th year of ME Awareness Day and to honour May as an Awareness Month for many illnesses and conditions that are known to often be linked (ME, Fibromyalgia, Lyme Disease, EDS, PANS/PANDAS, MCS), the Academy of Nutritional Medicine is organising a conference entitled "**Multi-System Diseases: Improving Patients' Lives with Proper Diagnosis and Appropriate Treatment Interventions**" (details of the event can be found at: <https://multisystemdiseases.eventbrite.co.uk>).

As a resident in your constituency and being aware of your interest in these difficult and debilitating conditions that affect so many people, both throughout the country and locally, I would like to cordially invite you to this conference which will take place on **12th May 2019 (ME Awareness Day) at the Holiday Inn London - Regents Park, Carburton Street, W1W 5EE, between 10 am and 5.30 pm.**

As you are already aware, despite technological innovations, medical advances and widely available information, these conditions are still not being given the urgent attention they require – either by the medical profession or by world governments. **As a result, millions of patients around the world are suffering, many dying as a direct consequence of medical ignorance and neglect.** Regrettably, misdiagnoses result in costly, delayed or inappropriate treatment and can ultimately lead to serious harm to patients.

At this upcoming event, the Academy of Nutritional Medicine (AONM, www.aonm.org) are bringing together several inspirational and eminent scientists whose research and work challenges the misconceptions of the status quo whilst putting patients' welfare first. The conference speakers will explore how current developments in the field of multi-system diseases are changing the prognosis of afflicted individuals and how obtaining an accurate and timely diagnosis can be crucial to a patient's long-term health outcome.

I would greatly appreciate you taking the time to attend and hear from eminent doctors who are researchers in the field as well as patients and campaigners who are battling, not just with these debilitating illnesses but also with the lack of medical care to help them improve their quality of life.

Complimentary tea & coffee, still & sparkling mineral water, whole fruits & snacks, nuts, dried fruit and seeds will be available on arrival, at registration and during breaks. Your complimentary ticket also includes a three-course buffet lunch in the restaurant with vegan and gluten-free options.

To confirm your VIP reservation and for any questions relating to this event, please contact clare.palmer@eonm.org

Kind regards,

Academy of Nutritional Medicine (AONM)
